PROFILE

I'm a full-stack developer with dedication for cybersecurity, currently pursuing specialization in cyber operations. I'm driven by curiosity to explore emerging technologies and innovative concepts, whether they directly enhance my programming expertise or expand my technical knowledge.

PROJECTS

Makmela.com FEB 2025 - JULY 2025

Honey website

Developed and deployed a full-stack e-commerce platform using React with modern hooks and state management, Tailwind CSS for responsive mobile-first design, NestJS backend with TypeScript for type-safe APIs, and PostgreSQL database with optimized queries. Implemented complete product catalog with filtering, dynamic shopping cart functionality with real-time inventory tracking and order management system.

Telegram Bot OCT 2024 - NOV 2024

Telegram Bot for tracking Crypto

Developed an automated Telegram bot using Python and cryptocurrency APIs to track portfolio performance and deliver real-time market data notifications, featuring customizable alerts, price monitoring, and portfolio analytics for multiple digital assets.

Social Media JULY 2025 - PRESENT

Social Media website

Developing a dynamic social media platform using Angular with TypeScript, Tailwind CSS for responsive design, NestJS backend with RESTful APIs, and PostgreSQL database, featuring user authentication, real-time messaging, content sharing, and interactive social feeds with like/comment functionality.
